SUMMARY

Full-Stack Web Developer and **B.Tech Computer Science student** with hands-on experience building scalable web applications using **React.js, Node.js, Express.js, and MongoDB**. Skilled in developing **RESTful APIs, authentication systems, responsive user interfaces, and AI-powered applications** using **Python and TensorFlow/Keras**. Currently expanding expertise in **Data Structures & Algorithms** and **Generative AI**, with a strong focus on building practical, user-centric solutions.

SKILLS

Languages: Python, JavaScript, TypeScript, C++, C

Frontend: HTML, CSS, React.js, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB

Tools & Platforms: Git, GitHub, Postman, VS Code

Soft Skills: Problem Solving · Analytical Thinking · Adaptability · Continuous Learning · Team Collaboration · Communication · Time Management

EXPERIENCE

PBEL Internship

IBM **July 2025 - August 2025**

- **Developed** a responsive **Food Ordering Web Application** using **React.js, Vite, Tailwind CSS, and JavaScript,** building reusable components and interactive user interfaces.
- **Implemented frontend state and event handling** to manage user interactions, dynamic content, and application workflows.
- **Designed responsive layouts** with **Tailwind CSS** and optimized frontend performance for consistent functionality across screen sizes and browsers.
- **Recognized among top-performing interns** and awarded a **₹4,000 performance-based stipend** for successful project completion.

PROJECT

Skin Cancer Detection System

July 2026 - August 2026

- **Engineered** an end-to-end **AI-powered skin lesion classification system** using **Python, TensorFlow/Keras, and Convolutional Neural Networks (CNNs)** trained on the **HAM10000 dataset.**
- **Developed** a **FastAPI backend** for image uploads, preprocessing, and **ML model inference**, providing API-driven prediction workflows.
- **Built** a responsive **React.js dashboard** featuring **prediction confidence scores**, **detection history**, and analysis metrics for visualizing model outputs.
- **Integrated** frontend, backend, and machine learning components into a unified application for streamlined **image-based classification and result tracking**.

Sahyata SOS

GitHub • github.com/asmitprajapati52/SOS-Crime-Report • March 2026 - April 2026

- **Built** an emergency crime-reporting platform using the **MERN stack**, enabling **anonymous incident reporting** and SOS-based emergency assistance.
- **Engineered** a real-time alert workflow to **capture, process, and route emergency reports** to designated response units.
- **Integrated the Browser Geolocation API** to capture users' **real-time coordinates** and transmit location data with distress alerts.
- **Refactored React components and Tailwind CSS structures** to improve **frontend performance, maintainability, and cross-device responsiveness.**

Lifeline 360

GitHub • github.com/asmitprajapati52/Lifeline360 • January 2026 - February 2026

- **Architected** a full-stack digital healthcare platform using the **MERN stack (MongoDB, Express.js, React.js, Node.js**) to coordinate workflows among **patients, hospitals, and ambulances.**
- **Engineered JWT-based authentication and role-based access control (RBAC)** with password hashing to manage secure access across different user roles.
- **Developed and integrated RESTful APIs** for **medical resource tracking and hospital-patient data synchronization**, enabling communication between frontend and backend services.
- **Optimized React state management** to minimize unnecessary component re-renders and improve **frontend performance and responsiveness.**

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering

Anand Engineering College affiliated with Dr. A.P.J. Abdul Kalam Technical University (AKTU) • 2027

Higher Secondary School

Colonel's Brightland Public School • Agra • 2023

Secondary School

Colonel's Brightland Public School • Agra • 2021
